

Bank Management System

1. Project Overview:

➔ The **Bank Management System** is a simple banking application developed using **Java Swing** and **MySQL**. This project allows users to perform essential banking operations like deposits, withdrawals, balance inquiries, and more. The system ensures secure transactions and user authentication, making it efficient for managing bank-related functionalities.

➔ Technologies Used:

- o **Programming Language:** Java (Swing for GUI)
- o **Database:** MySQL
- o **IDE:** Visual Studio Code

➔ If you want to understand more, go to READ.md in project and read it.

2. Features Explanation

➔ Authentication System:

- o Users need to log in to access banking features.
- o If an account does not exist, users must sign up first.

➔ Banking Operations:

- o Deposit – Add money to the account.
- o Fast Cash – Withdraw predefined amounts quickly.
- o Balance Enquiry – Check the current balance.
- o Mini Statement – View recent transactions.
- o PIN Change – Update the ATM PIN for security.

3. Installation Guide:

➔ Prerequisites:

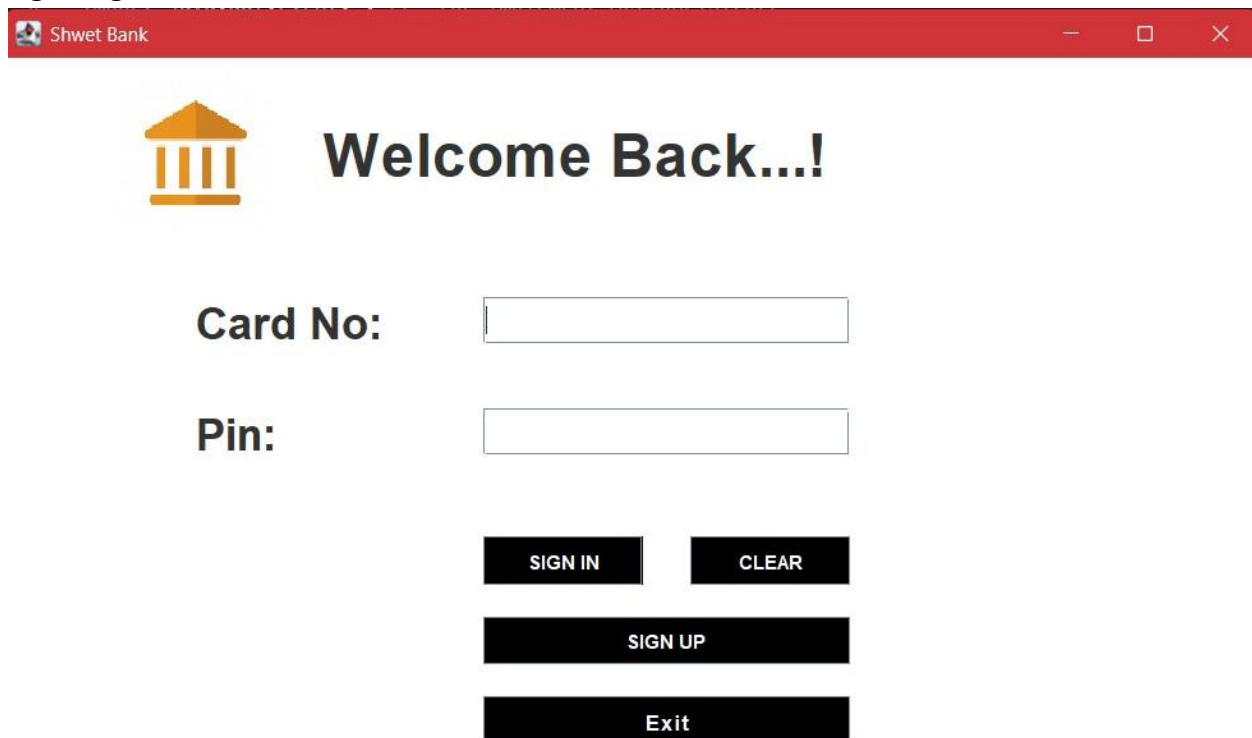

- o Install Java JDK and set up environment variables.
- o Install MySQL Server & MySQL Workbench.
- o Add mysql-connector-j-9.2.0.jar to the lib folder of the project.

➔ Steps to Run the Projects:

- o Every time, you have debug Login.java to start the application.

4. Screenshots:

Login Page:

The screenshot shows a web application window titled "Shwet Bank". The page features a yellow bank icon and the text "Welcome Back...!". Below this, there are two input fields labeled "Card No:" and "Pin:". At the bottom, there are four buttons: "SIGN IN", "CLEAR", "SIGN UP", and "Exit".

Shwet Bank

Card Number: 5040XXXXXXXX0651

Fri Mar 21 00:16:14 IST 2025	Deposit	5000
Fri Mar 21 00:16:22 IST 2025	Deposit	5000
Fri Mar 21 00:16:28 IST 2025	Withdraw	200
Fri Mar 21 00:16:36 IST 2025	Withdrawl	1000

Your current account balance is Rs 8800

5. Conclusion:

➔ Challenges Faced:

- o Implementing secure authentication
- o Managing database connections efficiently.

➔ Future Improvements:

- o Add Advanced Validations.
- o Adding fund transfer between accounts.
- o Implementing loan and interest accounts.
- o Enhancing the UI/UX design
